*Note: Assay composites were calculated using uncut assays and are reported as drilled widths and interpreted to vary between 20% to 100% of true widths. It should be noted that PG16-198 has an estimated true thickness of 2.3 metres.*

*\* Partial results from 395.0 - 399.6 metres by metallic screen fire assay. Assaying of hole PG16-215 outside of this interval is incomplete.*
