About Pure Gold Mining:

Pure Gold is a Canadian focused gold developer. It has recently released the feasibility study for its flagship project, the Madsen Red Lake Mine, which outlines a 12 year mine life, current probable reserves of one million ounces at 9 g/t Au in 3.5 million tonnes, an 800 tonne per day underground mining operation with comparatively low initial capital cost and strong financial performance. In addition, exploration targets and satellite resources not considered in the feasibility study suggest potential opportunities for near-term growth.
